

Crossover

A highly distinctive canopy for outdoor promotional events and occasions:
With its striking shape and ease of handling, Crossover is a winner.

Surface area:

68.0m²

Side length:

8.23m

Overall height:

4.95m

Entrance height:

2.50m

Strengths

Crossover stands out. The structure can be printed over its entire surface and can be erected individually or joined together in groups. To create a different feel inside and provide additional protection, the sides can be closed off with a special zip closure system. Audio-visual and lighting equipment can be mounted in the gable and in each corner.

Use

The Crossover structure is particularly suited to outdoor promotions, events and product presentations. With a variety of anchoring options, Crossover is also suitable for use as a stage canopy or for VIP platforms.
