

Cyclone

The cyclone structure combines the mobility of a tent with the architectural demands of a fixed construction. The flat roof tilts down to one corner and thus creates a unique sense of space inside.

Dimensions:

W 5.0m

D 5.0m

H 2.7m

Floor area:

25.0m²

Strengths

The side walls made of glass give the space a light and open appearance. At the same time, they offer a high level of security and good insulation properties. The individual modules can be combined in multi-faceted ways. Roof fascias are used for effective branding.

Use

Whether it's for product presentations, special events or even for temporary points of sale: with Cyclone, a stylish location with individual design possibilities is created at every venue.
